## Selected long stapled cotton

STRICT SELECTION OF LONG-STAPLE COTTON

YRF 95% goose down duvet is made of natural long stapled cotton, which is grown under advantageous sunshine condition and day-and-night temperature difference, so that its texture is really soft and comfortable.

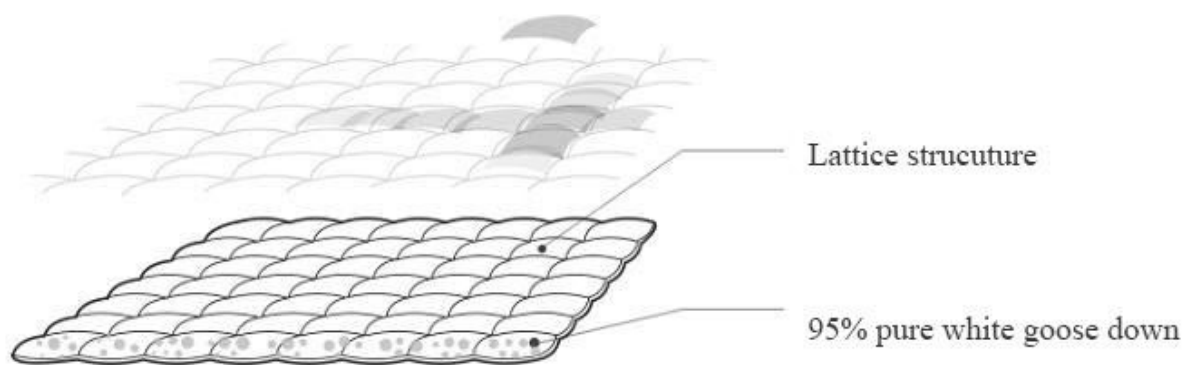

## Lattice design

SQUARE HEATING

Selected large white goose feather filled into stereo quilted lattice, super warm

## American AE downproof stitching

UNITED STATES AE LOCK DOWN

Imported No.6 sewing machine, 3cm stitch density with 14-15 needles, American AE yarn perfectly blocking the needle hole, make downproof beddings.

The higher number of needles make better down-proof property.

# *IDOWN* feather

Strict compliance with international quality control standard, every feather down is pure and clean.

## 1 210 days of growth cycle

The fine goose feather type introduced from Canada, with over 7 months of growth cycle, every feather down is large and odorless.

# National design patent: ZL 2010 3 0617149.7

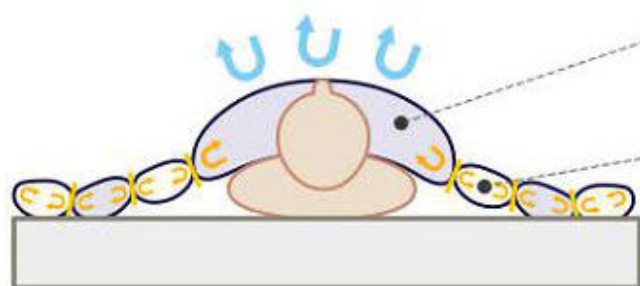

---

This appearance design, based on ergonomics and application scenarios, introduces the partition concept into duvet, keeping warm and windproof, thus forming the internal temperature circulation.

Windproof design for neck and shoulder

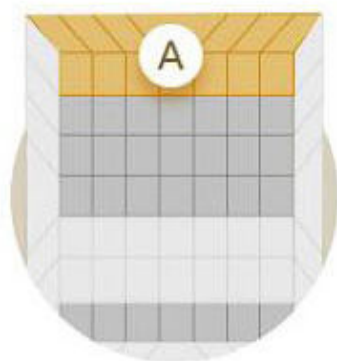

Windproof edging design

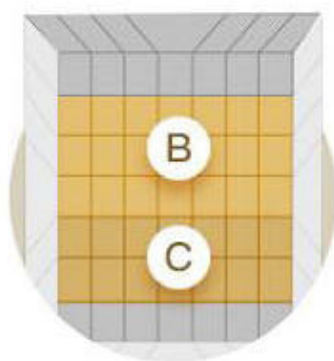

Avoid heat dissipation

Double-sided temperature adjustment

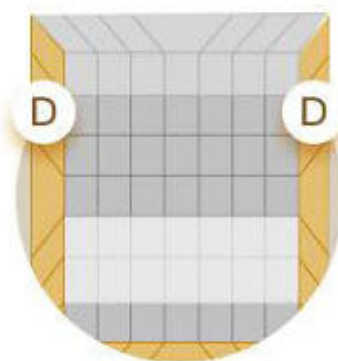

Internal heat accumulation

Innovative 45° windproof design for neck and shoulder,  
Cut edges 45° at shoulder and feet areas where easy to feel cold.

Three-dimensional pleated lattice design in the middle area makes the filler keep fluffy and full, enhancing heat storage capacity.

The diamond-shaped edging design allows the heat energy to circulate in the quilt, bringing warm feeling.

## 5 700+ fluffy feather down

The filling power, which refers to the standard amount of every 30g feather down, is an index indicating the heat retention property of down products. The number of cubic inches occupied in a cup. The more warm air, the better heat retention

## MICROCIRCULATION AIR LAYER

### MICROCIRCULATION AIR LAYER

The goose feather fiber is densely distributed with thousands of triangle small holes, which can contract or expand with the temperature, thus regulating the temperature, absorbing the heat, and preventing the cold air.

## United States AE down-proof thread

UNITED STATES AE LOCK DOWN

Imported No.6 sewing needle sewed, with 14-15 stitches in each three meters, American AE down-proof thread, effectively block the needle hole.

Higher stitch density, better down-proof effect

# Partition patent

专利号: ZL 2010 3 0617166.0

The Water Cube structure is introduced into goose down quilt to create three-dimensional six-sided topological structure. The six-sided heat energy convection makes the quilt get warm more quickly.

Six-sided heat energy convection

Get warm more quickly

## SPACE CAPSULE-LEVEL WARMTH

SPACE CAPSULE LEVEL WARMTH

By simulating the form of space capsule, according to the scientific division ratio, each area of duvet has different warmth effect, so that the human body can feel the soft texture like sleeping in clouds.

## Selected 120S long stapled cotton

120S SOFT FABRIC, NEW UPGRADE

---

Long stapled cotton is named for its long fiber. It is grown under advantageous sunshine condition and day-and-night temperature difference. Its soft texture is favored by people. With it, you can enjoy five-star quality sleep at home.

## 7 Hand picked

Each goose down quilt is carefully crafted with large goose down to reach higher filling power.

Ensure the high purity of goose down and enjoy five-star sleep every night.
