## NON-FR STRETCH PANTS

The stretch lines of Xinke Protective redefine what you can expect from a fabric in terms of comfort, offering greater freedom of movement and total ease of wear. The superior stretch and recover qualities also mean that garments flex and respond to movement without placing strain on their construction, and maintain their original shape, and appearance.

Four ranges of fabrics to meet every customer's needs, providing comfortable and stylish workwear to more industries.

- 1 Two-way stretch fabrics—enough stretchiness to provide wearers the ability to move without restriction.
- 2 Flame resistant mechanical stretch fabrics—Uses a mechanical coated yarn process. Wear resistance, anti pilling, long use life, maintain high performance and eliminates potential skin discomfort caused by elastic products in some flame retardant treatment. Meanwhile, this fabric has both USA and EU certificate, and washable more than 100 times.
- 3 Flame resistant super soft denim stretch fabrics—Keep soft feeling from the source of raw materials, these super soft stretch fabrics provide a comfortable wearing experience at work. Let you also feel a relaxed mood of yoga experience at work and washable more than 100 times.
- 4 New upgraded stretch fabrics—As the global sustainable safety solutions provider, Xinke Protective is constantly innovating to meet the safety, comfort, and sustainable characteristics of workwear. So even with the most traditional workwear, we can find new ways to improve the wearing experience and protect the environment.
  - CN88/12 Duck stretch fabrics
  - C100 Duck stretch fabrics
  - C100 Ripstop stretch fabrics
